Supervisor Buckley informed the Board that he had responded to questions regarding the hardness and residual chlorine levels of the new Farney Pit Road wells. He reported that he has questioned the Town Engineer in regards to treatment and associated costs. The Town Engineer responded that he is unaware of any municipality that treats a groundwater source for hardness and suggested that the cost of such treatment would be prohibitive. Supervisor Buckley has recommended that individual users, preferring softer water, consider home water softener systems. Supervisor Buckley shall work with the system operator to balance the chlorine residual to meet NYS Department of Health regulations and provide a palatable product for users.
